## 3 tips to getting the best result for your polished floor

### Take care of the blank canvas

Your concrete floor or pad is like a blank canvas and the finish you want depends hugely on how well the concrete has been placed and prepared.

Get in contact to receive your FREE Concrete quality guide with further details about what to look for - or better yet let us get in touch with your builder/concrete layer.

### Dry it slowly

In our experience using a **CURING BLANKET** on newly laid concrete greatly improves the end result of your polished floor.

Enquire today about adding a **CURING BLANKET** to your job

### Protect your investment

**PROTECTA BOARD** should be put down after we have polished your floor. It helps protect your new investment against, paint, water, mud and scratches
